## Picote Heater 2.0

The Picote Heater 2.0 is highly effective at reducing drying times and boosting efficiency during Picote Brush Coating™ applications.

- For DN50-DN300 pipes
- Max Temperature: 55°C
- Max Air Volume (m3/h): 2.1
- Max Air Velocity (m/s): 73
- Accelerate drying of wet pipes
- Shorten intervals between coats
- Reduce curing time for Picote Brush Coating™ projects
- New dual automatic thermal cut-offs for reliability and safety
- Adjustable airflow for customised performance
- Heating elements can be independently switched off to allow airflow for effective pipe cooling
