

Picote Hybrid Midi Roller & Wet Out Station

Compact unit allows you to work anywhere!

The new Hybrid Midi Roller is for wetting out CIPP liners from DN50-225 (2-9"). This lightweight and compact unit can be powered by the integrated battery or plugged in and charged during use.

Can be mounted on a separate work surface or combined with the Midi Roller Wet Out Station (*sold separately*) which doesn't require an additional power source – it's driven by the Midi Roller!

USES AND BENEFITS

Midi Roller

- Hybrid unit: The built-in high performance battery with approx. 10 hours of working time allows you to work anywhere without access to electricity or plug into a 220V or 110V electric source and charge while in use.
- Variable speed and bi-directional controls.
- Belt features a silicone surface and rubberized upper wheel, making the process easier.
- Lightweight, compact & easy to transport (18kg/40lbs).
- Upper roller lifts up making wet out faster and easier.
- Optional Liner Holders serve as an extra set of hands to help pour resin into the liner.

Wet Out Station

- Innovative and practical addition to the Midi Roller.
- No additional power source needed - powered by the battery powered Midi Roller belt.
- Built-in wheels and transport handle. Quickly & easily set up your Wet Out Station at the job site.
- Lightweight, compact, & easy to transport (36kg/79.4lbs)
- Easy to set up - simply add the Midi Roller to create a complete powered Wet Out Station with a combined belt length of 1.5m (59").
